

International Colloquium on Architecture-Structure Interaction for Sustainable Built Environment
18, 19 & 20 November 2013, India Habitat Centre, New Delhi, India

Date: 01 August 2013

President
Czech Association of Consulting Engineers

Greetings from SEWC India Colloquium 2013

Dear President,

I am happy to inform you that SEWC (Structural Engineers World Congress – India) is conducting an international colloquium in New Delhi during November 18, 19 & 20, 2013 on the subject “Architecture-Structure-Interaction for Sustainable Built Environment”. The International Colloquium is being organized in association with Consulting Engineers Association of India (CEAI), Indian Association of Structural Engineers (IAStructE) and supported by the Ministry of Urban Development, Government of India.

The first International Symposium by SEWC was held in 1988 in San Francisco, USA and the 2nd SEWC was held in the year 2002 in Yokohama, Japan. The 3rd SEWC was held in Bangalore, India in the year 2007 and the 4th International Symposium by SEWC was successfully conducted in Como, Italy, in April 2011.

SEWC aims to cover major aspects pertaining to technical and professional practice. The congress focuses on the needs and contemporary issues of the structural engineering profession worldwide and highlights the profession’s interface with the society.

This is an important event and a galaxy of experts on the subject from all over the world have already agreed to be the Keynote Speakers. It is a grand opportunity for the members of your Association to visit New Delhi, India and participate in this Colloquium. I would, therefore, request you to circulate the brochure to your members. Your participation, in particular will be highly appreciated.

I look forward to receive your positive response.

With regards,

Yours sincerely,

S.C. MEHROTRA,
Chairman – SEWC 2013 Organizing Committee
President – IAStructE
