

Purpose of processing the CACE DAB Study

CACE - Czech Association of Consulting Engineers (www.cace.cz) is an association of organizations providing engineering consulting services.

CACE is a member both of the world federation FIDIC (www.fidic.org) and of the European Federation of Associations of Consulting Engineers EFCA (www.efca.be).

CACE supports the use of standard FIDIC contract conditions in the Czech Republic. As a next step, CACE seeks to introduce and use Dispute Adjudication Board procedures to resolve and prevent disputes on sites during the implementation of works.

For this purpose, CACE is preparing a "DAB Study" entitled:
Problems and experience with the resolution / assessment of disputes by engineers / experts during construction in selected countries (DAB adjudication according to FIDIC).

To gather relevant information we use the DAB Study Questionnaire.

Anyone who sends a completed questionnaire to the address of the author of the Study jalomil.kacena@gmail.com will receive the Study English text upon completion of the DAB Study.

Thanks for your kind cooperation.

Author of DAB Study:

Ing. Jaromír Kačena
